

Last Lab

Bovine Impressions

- This was by far my favorite lab, usually the most difficult part of these assignments is getting inspired to make something clever, I usually throw out a lot of Lorem Ipsum or Alice in Wonderland text because I am a little behind the creative curve. Fortunately this assignment really spoke to me, yes the cows spoke (spoke?) to me. They said let us float in the air until someone clicks us, and I made it so
- I have wanted to implement some physics for a while and the Movers Shakers Lab served to whet my appetite. The ease functionality makes this dead simple. I was surprised how succinct my code ended up being.
- Compared to my other projects I am, by far, most proud of this submission I would like to thank the cows for their efforts and apologize for the dozens of time they will surely plummet to the ground.
- On a serious note this lab served a good point, it drove the DOM and get element by mentality that is JQuery. It has made an impact on me that will not be forgotten.
