Development Journal

Lab: JQuery Animation

What I learned

- The more organized / well laid out your code the easier it is to spot errors.
- JQuery Plugins are a powerful tool to integrate customizable animations and navigation panels
- I think this lab reinforced the power of three tiered design, my markup is simplistic but with creative CSS and a cool menu plugin I was able to create a page that does some interesting things
- There is a wealth of JQuery plugins out there
- The importance of z-index: for layering
